Professional Summary

Manual Test Engineer with 3 years of experience in quality assurance and testing of hardware and software applications. Good at designing and executing test plans, identifying defects, and ensuring the delivery of high-quality products. Seeking a challenging position to contribute my skills and expertise to a dynamic team.

Skills

- Manual Test Case Design and Execution.
- API testing using Postman
- Selenium WebDriver using Java for Automated Testing.
- Regression Testing Strategies.
- Defect Tracking and Management using JIRA.
- Operating Systems: Windows, Linux

Experience

Associate Product Engineer   10/2021 - Current

Western Digital Technologies - Bangalore (Outsourced from Magnit India Pvt. Ltd)

- Collaborated across teams to grasp software and hardware requirements, devising comprehensive test cases for thorough coverage.
- Conducted manual testing on software and hardware, pinpointing defects, usability glitches, and compatibility issues.
- Executed test cases and conducted regression testing on software updates, ensuring product stability.
- Coordinated closely with the development team for timely, high-quality software releases.
- Supported in crafting automated testing scripts and engaged in automation projects.
- Managed defect tracking using tools like JIRA, overseeing issues throughout the testing phase.
- Conducted ad-hoc and exploratory testing, highlighting critical issues and usability concerns.
- Contributed to refining the testing process by suggesting and implementing efficiency improvements.
- Continuously contribute ideas and suggestions for improving testing processes, methodologies, and efficiency, aiming for optimized workflows and higher quality deliverables.
- Actively participated in in-house development projects focused on infrastructure maintenance and enhancements.
